

## PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC  
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

## Sample Pods Hybrid

|                   |                                     |          |                                       |
|-------------------|-------------------------------------|----------|---------------------------------------|
| Sample ID         | SD220708-008 (48708)                | Matrix   | Concentrate (Inhalable Cannabis Good) |
| Tested for        | Cabo Ella Group DBA Smilyn Wellness |          |                                       |
| Sampled           | -                                   | Received | Jul 07, 2022                          |
|                   |                                     | Reported | Jul 08, 2022                          |
| Analyses executed | CAN20                               |          |                                       |

**Laboratory note:** The estimated concentration of the unknown peak in the sample is 6.9%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. The estimated total d8-THC concentration is 55.9%.

## CAN20 - Cannabinoids Analysis
